

Suggested Outline for Project Proposal

- Executive Summary: 1-2 paragraph statement of project goals and deliverables emphasizing the benefits to the university/department/faculty/client, outline of methodology, and statement of time and budget required.
- Introduction: Statement of problem context (background) and problem essentials (foreground).
- Project Statement: Expanded statement of goals. Clarify the deliverables of the project.
- Methodology: Description of approach to be taken. Organize in subsections. Motivation for the approach and the advantages and disadvantages of the approach. As necessary, provide definitions and a brief technical outline. Note skills to be learned by students.
- Resource Requirements: Identify software, hardware, facilities, space, funding and data required for project completion. Identify what data you will collect, and what data and services the university/client will provide.
- Schedule: Set up a method for the client to monitor the project through measurable accomplishments, milestones, and a meeting schedule with the client. Include a timeline or list of dates and deliverables.
- Budget: Outline monetary requirements for the project along with a schedule for expenditure.
- Contacts: It may prove useful to identify all parties involved with their contact information
