

WEEKLY REPORT :

Project Title: Self Driving RC Car

Date: 9/15/2026

Instructor: Dr. Nguyen

TA: Ruben Ramirez

Project Members:

- Ethan Wells (Group Leader)
- Alexis Perez
- Ethan Bishop
- Abigail Duran

Weekly Summary (9/15/2026):

- This week Ethan Wells completed the traffic-sign model milestone from last week's plan: he trained a convolutional neural network on the GTSRB German traffic-sign dataset to about 95% validation accuracy, and committed both the trained model and the training script to the project repository, working in a Python 3.12 environment (the version TensorFlow currently supports). Updates from the rest of the team on the ultrasonic sensor, IMU, and camera/schematic work are pending and will be added before submission.

Proposed Plan for Next Week:

- Ethan Wells: Prepare the LISA dataset (US traffic signs) for training.
- Alexis Perez: [Pending — to be provided]
- Ethan Bishop: [Pending — to be provided]
- Abigail Duran: [Pending — to be provided]

Weekly Contributions:

- Ethan Wells:

- 9/10/2026 – Built and ran the first CNN training on the GTSRB German traffic-sign dataset in TensorFlow (3 hours)
- 9/14/2026 – Tuned the model to ~95% validation accuracy and committed the trained model (gtsrb_model.keras) and training script to the repo (4 hours)
- Alexis Perez:
- [Pending — awaiting progress and hours]
- Ethan Bishop:
- [Pending — awaiting progress and hours]
- Abigail Duran:
- [Pending — awaiting progress and hours]
-

Hour Tracker:

Name	Hours For the Week	Cumulative Hours
Ethan Wells	7	12
Alexis Perez	TBD	TBD
Ethan Bishop	TBD	TBD
Abigail Duran	TBD	TBD
